hyperstone®

We are looking for brains

Software Engineer (m/f/d)

For our product support team

Your Tasks

- Development of firmware enhancements and optimizations
- Design and development of API (Application Programming Interface)
- Support our customers in handling our leading-edge flash memory controllers in their flash mass storage products
- By working with the full range of Hyperstone products, you will be able to actively contribute to the design and development of our current as well as future products
- After an initial training period you will be working on challenging tasks independently and also as a part of the team

Your Profile

- Advanced Engineering Degree (BSCS / MSCS equivalent) in computer science or electrical engineering
- Familiar with microprocessors and embedded system architecture, compiler and embedded software development tools.
- Profound development and design knowledge of programming language C and embedded software development background.
- Standard data structures and algorithms are well known and easily applied
- High attention to detail paired with analytical thinking and understanding of complex concepts
- Good written and verbal communication skills (English and German)

Your Benefits

- State-of-the-art engineering for innovative products
- Short decision making processes within a motivated team
- Attractive work environment directly at Lake Constance
- Friendly and professional team with company events
- Flexible working hours & corporate benefits
- Adequate compensation package & a permanent position
