Hyperstone to showcase Flash Controllers & More at the Embedded World 2018

Hyperstone, a leading developer of Flash Memory Controllers, announces demonstration of its latest technology at the Embedded World Conference, February 27. – 1. March, 2018, in Nuremberg Germany (Hall 1 Booth 301).

Konstanz, Germany, February 7. – Today, Flash Memory Controller specialist Hyperstone has announced they will be exhibiting again at the Embedded World Fair in Nuremberg. The company's focus in 2018 is enabling secure storage solutions with their Application Programming Interface (API). This leading edge software enables developers to add their own customer firmware extensions (CFE) to Hyperstone's controllers, allowing them to address unique applications with innovative features. API development boards for S8 SD card controller and U9 USB Flash drive controller will be featured at the show alongside several successful customer applications to demonstrate the ways in which Hyperstone controllers can be embedded across a range of designs.

At the show, Hyperstone will also be showcasing a range of industrial standard Flash Memory Controllers together with their hyMap firmware which is best in class for random R/W-performance and extended lifetime. Designed for robust Flash Memory drives, Hyperstone's U9 family of controllers are compatible with host systems that have USB 3.1 SuperSpeed 5Gbps interfaces. Hyperstone also supports legacy host interfaces and strives to support customers with longer-term storage requirements and interfaces that have been in the market for decades. Those interested in state of the art Flash support for legacy host interfaces are encouraged to meet with Hyperstone to discuss the companies' new F9 CompactFlash (CF) controller, which enables 3D NAND Flash.

Hyperstone's VP of Sales, Steffen Allert welcomes industry professionals and interested visitors to Hall 1 Booth 301 at the Embedded World. "The Embedded World is the leading international fair for embedded systems and we kindly invite those interested to come and learn more about our extensive range of reliable Flash Memory Controller products, or to discuss designs and potential projects. We will not only be showcasing products, but also state of the art tools which allow one to select the most compatible Flash". The Embedded World will be held at the Nuremberg Exhibition Center from the 27. February – 1. March.

About Hyperstone

Hyperstone is a fabless semiconductor company based in Konstanz, Germany with a strong focus on world class Flash Memory Controllers for industrial embedded markets. Its products set the standard for high-reliability Flash management providing confidence for NAND Flash performance in mission critical situations. Hyperstone's products include microcontrollers for various host interfaces and performance points, e.g. SATA, USB, CF/PATA, SD/microSD and eMMC. Flash controller firmware is supplied complementary to the controllers and customized for each flash and application. Hyperstone is a member of the CML Microsystems Plc group, traded on the London Stock Exchange.
