

REACH Declaration

Regulation (EC) No. 1907/2006 (REACH) 191 SVHCs

REACH (Registration, Evaluation, Authorization of Chemical Substances) is the European Community Regulation on chemicals and their safe use. The law entered into force on 1 June 2007.

As Hyperstone does not manufacture or import any chemical in excess of 1 tonne per year, Hyperstone does not have to register under the regulation.

Furthermore, Hyperstone products do not contain any "Substances of Very High Concern" (SVHCs) beyond the limits defined in the REACH Regulation (updated 15 January 2018), in conjunction with the devices listed in Annex 1. SVHCs are chemicals that are considered to be toxic, carcinogenic, mutagenic, reproductive toxins and harmful to the environment.
