

# We are looking for brains

*Hyperstone, a fabless semiconductor and microprocessor design company, based in Konstanz, Germany, serves a global customer base together with subsidiaries in Taiwan and USA. Hyperstone is a member of the CML Microsystems Plc group, traded on the London Stock Exchange. The company's success is based on its own proprietary 32-Bit RISC processor, optimized for flash handling applications. Hyperstone's products include microcontrollers for Solid State Drives, embedded flash solutions such as eMMC, and flash applications like CF, SD & microSD as well as USB.*

## Software Development Engineer for our Firmware Development Team in Konstanz, Germany

### Your Tasks

As a software development engineer you will be part of our software design team and support the firmware development for our flash memory controllers. For this position we are looking for experienced software developers with development and design knowledge of the programming language C and an embedded software development background. Your abilities will enable you to contribute to the design and development of new, leading-edge, flash-based mass-storage products. After an initial training period you will be working on challenging tasks independently as well as a part of the team.

### Your Profile

- Advanced Engineering Degree (MScs equivalent, PhD is a plus) with several years of software development experience,
- Standard data structures and algorithms are well known and easily applied,
- Familiar with microprocessors, embedded system architecture, compiler and embedded software development tools,
- High attention to detail, analytical thinking and understanding of complex concepts
- Good written and verbal communication skills (English and German).

### Your Benefits

- State-of-the-art engineering for innovative products,
- Short decision making processes within a motivated team,
- Attractive work environment directly at the lake of Constance,
- Flexible working hours,
- Adequate compensation package and a permanent position.

If you appreciate a feeling of accomplishment and want to set things in motion, if you are up for the challenge we look forward to receiving your application.
