Hyperstone awarded JOSCAR Certification for Supply Chain Security

Constance, Germany, May 31st, 2023 – Hyperstone is proud to announce that it has been awarded the JOSCAR certification and is now recognized as a fully compliant supplier for several security companies and major organizations, effective April 18th, 2023. The Joint Supply Chain Accreditation Register (JOSCAR) is a collaborative accreditation and compliance system used by the aerospace, defense, and security industries to ensure that suppliers meet the high standards required for these sectors.

JOSCAR's administration organisation, Hellios, apply a detailed examination into all its applicants, which reassures their buying organizations that suppliers are reliable and trustworthy. By managing essential supplier data and providing relevant insight, Hellios builds confidence in the supply chains of industry communities in a cost-effective and agile way.

JOSCAR certification is a mark of quality and demonstrates that Hyperstone has met the stringent requirements for supply chain security, including information security, cyber security, and corporate social responsibility. The certification is recognized by major companies in the aerospace, defense, and security industries, and will enable Hyperstone to continue to provide high-quality products and services to its customers.

"We are delighted to have been awarded the JOSCAR certification," said Steffen Allert, VP Sales at Hyperstone. "This certification is a testament to the hard work and dedication of our team and demonstrates Hyperstones commitment to working with the UK's aerospace, defense and security sectors. We are committed to maintaining these standards and providing our customers with the best possible service."

About Hyperstone

Hyperstone is a fabless semiconductor company based in Constance, Germany with a strong focus on world class flash memory controllers for industrial embedded markets. Its products set the standard for high-reliability flash management providing confidence for NAND flash performance in mission critical situations. Hyperstone's products include microcontrollers for various host interfaces and performance points, e.g., SATA, USB, CF/PATA, SD/microSD and eMMC. Together with the hyMap® flash translation layer (FTL), the hyReliability™ feature set, reference designs, health monitoring, maintenance, and production tools Hyperstone offers a turnkey solution for storage media integrators. Hyperstone has been part of Swissbit Holding AG since 2020.
