

Hyperstone's Environmental Commitment

Hyperstone supports the concept of conserving the natural environment and aims to manage its operations on ways that are environmentally friendly and economically friendly and economically viable.

In accordance with this view, Hyperstone conducts its operations in a manner that is expected to achieve the following environmental objectives.

- To comply with or exceed the requirements of the relevant environmental legislation governing Hyperstone's business operations
- To use energy and water efficiently for the purpose
- To minimize waste production, as far as this is reasonable and practical, and to control the treatment and disposal of waste produced.
- To minimize or abolish any hazardous material such as i.e. Lead, Mercury, Cadmium, Hexavalent Chromium, PBB and PBDE
